

## Math Worksheets

### Graphing Quadratic Functions

 sketch the graph of each function. Identify the vertex and axis of symmetry.

1)  $y = (x + 3)^2 + 2$

2)  $y = (x - 3)^2 - 2$

3)  $y = 6 - (-x + 4)^2$

4)  $y = -3x^2 - 6x + 9$

# Answers of Worksheets

## Graphing quadratic functions

1)  $(-3, 2), x = -3$

2)  $(3, -2), x = 3$

3)  $(4, 6), x = 4$

4)  $(-1, 12), x = -1$
